Low-Carb Chicken Parmesan Without Breadcrumbs

55 min · Serves 6 · 537 kcal a serve · Video 10:41 · Low Carb Love

Gluten-free ingredients · No nuts listed

Lupin flour, whey and parmesan replace the breadcrumbs, so a serve has about 10 g net carbs and over 50 g protein, with a homemade tomato sauce that has no added sugar.

Allergens found in the listed ingredients: Egg, Milk, Lupin. Worked out from the ingredient list, not tested. Stock, sauces, spice mixes and other packaged foods can contain allergens, so always read the labels on what you buy. If you have a food allergy, don't rely on this.

Method TIMES = THE MOMENT IN THE VIDEO

1. Slice the chicken breasts in half horizontally into thin fillets. 0:37
2. Whisk the eggs with garlic powder, parsley, salt and pepper. Turn the chicken in the egg until fully coated, cover and chill 15–30 minutes. 1:03
3. For the breading, mix the lupin flour, whey protein, grated parmesan, garlic powder, onion powder and a good pinch of salt and pepper. 2:29
4. For the sauce, heat the avocado oil over medium heat and soften the onion until translucent. Stir in the tomato paste, water, garlic, Italian herbs, sweetener, salt and pepper; simmer covered 8–10 minutes until slightly thickened. 4:55
5. Heat the oven to 430°F. Lift each fillet from the egg and toss it in the breading until fully coated, using dry tongs. 6:10
6. Shallow-fry the fillets in hot oil until golden on both sides. 6:50
7. Lay them in a greased baking dish, spoon over the sauce, top with mozzarella slices, shredded parmesan and parsley, and bake 10–15 minutes until the chicken is cooked through and the cheese has melted. 7:05

> **Tip** Lupin is a legume, so skip this if you're allergic to lupin or peanuts. Chicken thighs work too. A no-sugar-added jar of marinara can replace the homemade sauce. The cook says the breading works without the parmesan.

The method is a summary in our words — the video shows every step.
