Crunchy crisps made from Parmesan and seeds, with no flour and no added sugar: about 1.5 g of net carbs and 8 g of protein a serve, and a source of calcium.

Diet notes: Keto (1.4 g net carbs a serve); Vegetarian with a vegetarian hard cheese instead of the parmesan (traditionally made with animal rennet).

Method TIMES = THE MOMENT IN THE VIDEO

1. Heat the oven to 175 °C and line a baking sheet with baking paper.
2. Toss the freshly grated Parmesan with the sesame seeds, poppy seeds, dried minced garlic and dried minced onion. No extra salt is needed. 2:30
3. Spoon the mixture onto the tray in 8 mounds of about 2 tbsp each, spaced apart, and flatten them into thin, even rounds so they bake lacy rather than thick. 2:49
4. Bake for 5–6 minutes, until the cheese has melted completely and the edges are golden and crisp. 2:52
5. Let them cool on the tray for about 5 minutes so they firm up and crisp, then lift them off.

> **Tip** Use freshly grated Parmesan; the pre-grated kind in a tub does not melt into a lacy crisp. Store airtight for up to 5 days. Other versions from the video: garlic powder with Italian herbs, or cheddar, ranch seasoning and jalapeño.
