Whole chickpeas, flax and psyllium replace flour: almost 6 g fibre for under 10 g net carbs a slice, so it is digested slowly, and it is a good source of folate and plant omega-3.

Diet notes: Low saturated fat (0.2 g, 2% of the energy).

Method TIMES = THE MOMENT IN THE VIDEO

1. Cover the dried chickpeas with plenty of water and soak about 9 hours, until they double to about 400 g. 0:35
2. Drain and rinse the chickpeas, heat the oven to 180 °C and line a baking tray with baking paper. 0:50
3. Blend the chickpeas with the 180 ml fresh water in a food processor, stopping to scrape down the sides, until you have a smooth batter. 1:01
4. Add the ground flaxseed, psyllium powder, salt, baking powder, baking soda and vinegar and blend again until combined — the dough thickens quickly. 1:36
5. Tip the dough onto the tray and shape it into a round loaf with your hands, smoothing the top and sides with lightly wet hands. 2:22
6. Score the top with a sharp knife and, if you like, sprinkle over a few flaxseeds. 3:12
7. Bake 50–60 minutes, until the crust is firm and the base sounds hollow when tapped. 3:36
8. Let the loaf cool completely before slicing so the inside sets, then cut into 11 slices. 3:56

> **Tip** Use dried chickpeas, not canned, and psyllium powder rather than whole husks. Good with avocado, hummus or nut butter. Keep it in the fridge a few days or freeze it sliced.
