Method

TIMES = THE MOMENT IN THE VIDEO

1. Pour the heavy cream into a 24 oz mason jar or other sealable jar. 0:38
2. Add the allulose. It keeps the ice cream scoopable for days; erythritol or monk fruit blends freeze harder and are sweeter, so use a little less of those. 0:54
3. Add the instant coffee, vanilla and a tiny pinch of salt. 1:54
4. Seal the jar and shake for 2–3 minutes, until the cream thickens and nearly doubles in volume. 2:15
5. Freeze for 4–5 hours. 2:28
6. Let it stand for a couple of minutes, then scoop out 3 large scoops. 2:38

> **Tip** Use a jar of at least 3 cups so the cream has room to double. Choose an instant coffee you like the taste of; its flavour comes through strongly.
