Just meat, cabbage, onion and spices with no flour: about 38 g of protein and 14 g net carbs a serve, plus most of a day's vitamin C from the cabbage.

Diet notes: Paleo with a swap: olive, avocado or coconut oil instead of the oil.

Method TIMES = THE MOMENT IN THE VIDEO

1. Heat the oil in a wide pan and fry the chopped onion until light golden, about a minute or two. 1:37
2. Pour in a splash of the vegetable stock to soften the onion, add the caraway, salt and pepper (not the paprika yet) and let the liquid boil away until it sizzles. Repeat with the rest of the stock; the softened onion later binds the dish without flour. 2:10
3. When the pan is sizzling hot again, stir in the garlic and paprika for a few seconds (paprika burns easily), then add the mince right away and stir until browned and cooked through. Turn the heat down and cover. 4:30
4. Cut the core out of the cabbage and shred it finely with a slicer or knife; use roughly as much cabbage as meat. 5:27
5. Mix the cabbage into the meat and cook over medium heat for 20–25 minutes, stirring now and then so nothing catches, until the cabbage is tender but not overcooked. 6:58
6. Taste, adjust the seasoning and serve. 8:02

> **Tip** Serves 2 as a main on its own; the cook says 2–3 with boiled potatoes or bread dumplings. A green salad keeps it low in carbs. His 1½ tsp salt makes it salty, so add less and taste. Keeps 3 days in the fridge.

The method is a summary in our words, in English — the video (in German) shows every step.
