Fermentation usually mellows garlic's bite, so a couple of uncooked cloves add big flavour to dressings, dips and finished dishes for about 8 kcal. Most of the brine's salt stays in the jar: about 40 mg sodium a serve.

Diet notes: Low carb (1.7 g net carbs) but not keto: 3% of the energy is from fat, and keto meals get about 60% or more; Low saturated fat (0 g, 0% of the energy); DASH-friendly (40 mg sodium a serve).

Ingredients 4 · MAKES 28 × 2 CLOVES (6 G)

- [ ] about 5 oz peeled **garlic** cloves (1 heaping cup)
- [ ] **onion**, 1 medium-thick slice, cut up
- [ ] a few sprigs **fresh dill or rosemary** (optional)
- [ ] ½ oz (¾ tbsp fine) **salt** in 2 cups water, for the brine (about 1¼ cups fills the jar; the garlic takes up about 3 g)

Amounts in US units, converted from the cook's and rounded — the video has the originals.

Allergens found in the listed ingredients: none. Worked out from the ingredient list, not tested. Stock, sauces, spice mixes and other packaged foods can contain allergens, so always read the labels on what you buy. If you have a food allergy, don't rely on this.

Method TIMES = THE MOMENT IN THE VIDEO

1. Stir ½ oz salt (¾ tbsp fine salt) into 2 cups non-chlorinated water until dissolved. Wash a 1 pint jar and a fermenting weight in hot soapy water. 1:05
2. Peel the garlic, trimming off any blemishes; throw away any clove with even a speck of mould. Cut up the onion slice and snip the herbs, if using. 1:30
3. Put the onion in the bottom of the jar (it helps the fermentation start), then layer in the garlic and herbs, filling the jar about 75–80% full. 2:13
4. Pour in brine up to the jar threads, press the weight down firmly so everything is submerged, lift out any floaters and rest a loose lid on top (no burping needed). Stand it on a towel or dish to catch overflow. 2:55
5. Ferment on the counter, ideally 72–84°F, for 2–3 weeks, removing any floaters; start tasting around day 14. Bubbles for the first 7–10 days and blue-green cloves are normal. 4:49
6. When it tastes good and has no mould, remove the weight, close the lid tightly and refrigerate; it keeps for many months. 6:48

> **Tip** Makes 1 pint jar, roughly 28 two-clove serves (our estimate). Swap the herbs for chilli flakes or a dried Italian blend. Add to food after cooking to keep the live cultures.

The method is a summary in our words — the video shows every step.

One portion, 2 cloves (6 g), gives you 1 OF 28 · ESTIMATE

ENERGY	PROTEIN	CARBOHYDRATE	FIBRE	FAT	SODIUM
