A base made mostly of cauliflower: 6 g fibre and under 10 g net carbs per half base, with 18 g protein from the cauliflower, egg and cheese, far fewer carbs than a flour base.

Diet notes: Low carb (9.6 g net carbs) but not keto: 50% of the energy is from fat, and keto meals get about 60% or more; Vegetarian with a vegetarian hard cheese instead of the manchego cheese (traditionally made with animal rennet).

Method TIMES = THE MOMENT IN THE VIDEO

1. Pull the leaves off the cauliflower, cut it into quarters, cut away the stalks and break it into small florets. 0:20
2. Pulse the florets in a food processor until they look like rice. 0:36
3. Put the cauliflower in a saucepan with a little water (about halfway up) and cook over medium-high heat for about 10 minutes. 0:48
4. Drain it in a sieve for a couple of minutes, then tip it into a flour-sack or tea towel and squeeze out as much liquid as you possibly can — this is what stops the crust falling apart. 1:08
5. Put the cauliflower in a clean bowl, make a well, add the egg and beat it, then mix in the oregano, parsley, garlic powder, salt and finely shredded Manchego. 1:24
6. Press the mixture onto a baking tray lined with baking paper in a round about ¼ inch thick. 1:51
7. Bake at 410 °F for 30–35 minutes until golden and firm, then add toppings and return to the oven for 10–15 minutes. 2:09

> **Tip** Serves 2 as half a base each (our estimate). The cook tops it as a margherita: marinara, fresh mozzarella and basil. Parmesan or another hard cheese can replace the Manchego.
